

ldm06 — conditional 3-D U-Net denoiser

UNet3DDenoiser · 155 ch in @ 16³ · 128/256/512 · 83.0 M params · v-prediction · runs/ldm/ldm06-run-0001

GENERATION PATH — WHAT THE DENOISER IS CALLED FROM

Note — the input width is 155 channels at z=8. The 127 quoted in the UNet3DConfig docstring and the ldm06/base YAML is the figure at z=4; the code computes it, so only those comments are stale.
